CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS: This report contains “forward-looking statements” as defined under the U.S. federal securities laws. Generally, the words “believe,” “expect,” “intend,” “estimate,” “anticipate,” “project,” “will” and similar expressions identify forward-looking statements, which generally are not historical in nature. Forward-looking statements are subject to certain risks and uncertainties that could cause actual results to materially differ from the Fund’s historical experience and its present expectations or projections indicated in any forward-looking statement. These risks include, but are not limited to, changes in economic and political conditions; regulatory and legal changes; energy industry risk; commodity pricing risk; leverage risk; valuation risk; non-diversification risk; interest rate risk; tax risk; and other risks discussed in the Fund’s filings with the SEC. You should not place undue reliance on forward-looking statements, which speak only as of the date they are made. The Fund undertakes no obligation to update or revise any forward-looking statements made herein. There is no assurance that the Fund’s investment objectives will be attained.

- (a) Unless otherwise noted, equity investments are common units/common shares.
- (b) Unless otherwise noted, securities are treated as a publicly traded partnership for regulated investment company ("RIC") qualification purposes. To qualify as a RIC for tax purposes, the Fund may directly invest up to 25% of its total assets in equity and debt securities of entities treated as publicly traded partnerships. Although the Fund had 31.9% of its net assets invested in securities treated as publicly traded partnerships at May 31, 2008, the Fund had less than 25% of its total assets invested in these securities. It is the Fund's intention to be treated as a RIC for tax purposes.
- (c) Includes Limited Liability Companies.
- (d) Security is not treated as a publicly-traded partnership for RIC qualification purposes.
- (e) Fair valued and restricted security. (See Notes 2, 3 and 6).

(1) The information presented in each of these items is a current estimate of the characterization of a portion of the total dividends and distributions paid to preferred stockholders and common stockholders for the six months ended May 31, 2008 as either dividend (ordinary income) or distribution (long-term capital gains or return of capital). This estimate is based on the Fund's operating results during the period. The actual characterization of the preferred stock and the common stock dividends and distributions made during the current year will not be determinable until after the end of the fiscal year when the Fund can determine earnings and profits and, therefore it may differ from the preliminary estimates.

(2) The information presented in each of these items is a characterization of a portion of the total dividends and distributions paid to preferred stockholders and common stockholders for the fiscal year ended November 30, 2007 as either dividend (ordinary income) or distribution (long-term capital gains or return of capital). This characterization is based on the Fund's earnings and profits.

- (8) Calculated pursuant to section 18(a)(2)(A) and section 18(a)(2)(B) of the 1940 Act. Represents the value of total assets less all liabilities not represented by Auction Rate Preferred Stock and senior securities representing indebtedness divided by the aggregate amount of Auction Rate Preferred Stock and senior securities representing indebtedness. Under the 1940 Act, the Fund may not declare or make any distribution on its common stock nor can it incur additional preferred stock if at the time of such declaration or incurrence its asset coverage with respect to all senior securities would be less than 200%. For purposes of this test, the revolving credit facility is considered a senior security representing indebtedness.

NOTES TO FINANCIAL STATEMENTS
MAY 31, 2008
(amounts in 000's, except option contracts written, share and per share amounts)
(UNAUDITED)

1. Organization

Kayne Anderson Energy Total Return Fund, Inc. (the "Fund") was organized as a Maryland corporation on March 31, 2005 and commenced operations on June 28, 2005. The Fund is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as a non-diversified closed-end investment company. The Fund's investment objective is to obtain a high total return with an emphasis on current income. The Fund seeks to achieve this objective by investing primarily in securities of companies engaged in the energy industry, principally including publicly-traded, energy-related master limited partnerships and limited liability companies taxed as partnerships ("MLPs"), MLP affiliates, energy-related U.S. and Canadian royalty trusts and income trusts (collectively, "royalty trusts") and other companies that derive at least 50% of their revenues from operating assets used in, or providing energy-related services for, the exploration, development, production, gathering, transportation, processing, storing, refining, distribution, mining or marketing of natural gas, natural gas liquids (including propane), crude oil, refined petroleum products or coal (collectively with MLPs, MLP affiliates and royalty trusts, "Energy Companies"). The Fund's shares of common stock are listed on the New York Stock Exchange, Inc. ("NYSE") under the symbol "KYE."

2. Significant Accounting Policies

A. *Use of Estimates* — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ materially from those estimates.

B. *Calculation of Net Asset Value* — The Fund determines its net asset value as of the close of regular session trading on the NYSE (normally 4:00 p.m. Eastern time) no less frequently than the last business day of each month, and makes its net asset value available for publication monthly. Currently, the Fund calculates its net asset value on a weekly basis and such calculation is made available on its website, www.kaynefunds.com. Net asset value is computed by dividing the value of the Fund's assets (including accrued interest and dividends), less all of its liabilities (including accrued expenses, dividends payable and any borrowings) by the total number of common shares outstanding.

C. *Investment Valuation* — Readily marketable portfolio securities listed on any exchange other than the NASDAQ Stock Market, Inc. ("NASDAQ") are valued, except as indicated below, at the last sale price on the business day as of which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the most recent bid and asked prices on such day, except for short sales and call option contracts written, for which the last quoted asked price is used. Securities admitted to trade on the NASDAQ are valued at the NASDAQ official closing price. Portfolio securities traded on more than one securities exchange are valued at the last sale price on the business day as of which such value is being determined at the close of the exchange representing the principal market for such securities.

Equity securities traded in the over-the-counter market, but excluding securities admitted to trading on the NASDAQ, are valued at the closing bid prices. Fixed income securities with a remaining maturity of 60 days or more are valued by the Fund using a pricing service. Fixed income securities maturing within 60 days will be valued on an amortized cost basis.

The Fund holds securities that are privately issued or otherwise restricted as to resale. For these securities, as well as any other portfolio security held by the Fund for which reliable market quotations are not readily available,

valuations are determined in a manner that most fairly reflects fair value of the security on the valuation date. Unless otherwise determined by the Board of Directors, the following valuation process is used for such securities:

- **Investment Team Valuation.** The applicable investments are initially valued by KA Fund Advisors, LLC (“KAFA” or the “Adviser”) investment professionals responsible for the portfolio investments.
- **Investment Team Valuation Documentation.** Preliminary valuation conclusions are documented and discussed with senior management of KAFA. Such valuations generally are submitted to the Valuation Committee (a committee of the Fund’s Board of Directors) or the Board of Directors on a monthly basis, and stand for intervening periods of time.
- **Valuation Committee.** The Valuation Committee meets on or about the end of each month to consider new valuations presented by KAFA, if any, which were made in accordance with the Valuation Procedures in such month. Between meetings of the Valuation Committee, a senior officer of KAFA is authorized to make valuation determinations. The Valuation Committee’s valuations stand for intervening periods of time unless the Valuation Committee meets again at the request of KAFA, the Board of Directors, or the Committee itself. All valuation determinations of the Valuation Committee are subject to ratification by the Board at its next regular meeting.
- **Valuation Firm.** No less than quarterly, a third-party valuation firm engaged by the Board of Directors reviews the valuation methodologies and calculations employed for these securities.
- **Board of Directors Determination.** The Board of Directors meets quarterly to consider the valuations provided by KAFA and the Valuation Committee, if applicable, and ratify valuations for the applicable securities. The Board of Directors considers the report provided by the third-party valuation firm in reviewing and determining in good faith the fair value of the applicable portfolio securities.

Unless otherwise determined by the Board of Directors, securities that are convertible into or otherwise will become publicly traded (*e.g.*, through subsequent registration or expiration of a restriction on trading) are valued through the process described above, using a valuation based on the market value of the publicly traded security less a discount. The discount is initially equal in amount to the discount negotiated at the time the purchase price is agreed to. To the extent that such securities are convertible or otherwise become publicly traded within a time frame that may be reasonably determined, KAFA may determine an applicable discount in accordance with a methodology approved by the Valuation Committee.

Exchange-traded options and futures contracts are valued at the closing price in the market where such contracts are principally traded.

SFAS No. 157. In September 2006, the Financial Accounting Standards Board (FASB) issued Statement on Financial Accounting Standards (SFAS) No. 157, “Fair Value Measurements.” This standard establishes a single authoritative definition of fair value, sets out a framework for measuring fair value and requires additional disclosure about fair value measurements. SFAS No. 157 applies to fair value measurements already required or permitted by existing standards. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The changes to current generally accepted accounting principles from the application of this Statement relate to the definition of fair value, the methods used to measure fair value, and the expanded disclosures about fair value measurements.

As of December 1, 2007, the Fund adopted SFAS No. 157. The Fund has performed an analysis of all existing investments and derivative instruments to determine the significance and character of all inputs to their fair value determination. Based on this assessment, the adoption of this standard did not have any material effect on the Fund’s net asset value.

At May 31, 2008, the Fund held 0.8% of its net assets applicable to common stockholders (0.6% of total assets) in securities valued at fair value as determined pursuant to procedures adopted by the Board of Directors, with an aggregate fair value of \$8,847.

KAYNE ANDERSON ENERGY TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS — (UNAUDITED) (CONTINUED)

On March 19, 2008, Financial Accounting Standards Board released Statement of Financial Accounting Standards No. 161, “Disclosures about Derivative Instruments and Hedging Activities” (“SFAS 161”). SFAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The application of SFAS 161 is required for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. At this time, management is evaluating the implications of SFAS 161 and its impact on the financial statements has not yet been determined.

D. *Repurchase Agreements* — The Fund has agreed to purchase securities from financial institutions subject to the seller’s agreement to repurchase them at an agreed-upon time and price (“repurchase agreements”). The financial institutions with which the Fund enters into repurchase agreements are banks and broker/dealers which Kafa considers creditworthy. The seller under a repurchase agreement is required to maintain the value of the securities as collateral, subject to the agreement, at not less than the repurchase price plus accrued interest. Kafa monitors daily the mark-to-market of the value of the collateral, and, if necessary, requires the seller to maintain additional securities, so that the value of the collateral is not less than the repurchase price. Default by or bankruptcy of the seller would, however, expose the Fund to possible loss because of adverse market action or delays in connection with the disposition of the underlying securities.

E. *Short Sales* — A short sale is a transaction in which the Fund sells securities it does not own (but has borrowed) in anticipation of or to hedge against a decline in the market price of the securities. To complete a short sale, the Fund may arrange through a broker to borrow the securities to be delivered to the buyer. The proceeds received by the Fund for the short sale are retained by the broker until the Fund replaces the borrowed securities. In borrowing the securities to be delivered to the buyer, the Fund becomes obligated to replace the securities borrowed at their market price at the time of replacement, whatever the price may be.

All short sales are fully collateralized. The Fund maintains assets consisting of cash or liquid securities equal in amount to the liability created by the short sale. These assets are adjusted daily to reflect changes in the value of the securities sold short. The Fund is liable for any dividends or distributions paid on securities sold short.

The Fund may also sell short “against the box” (*i.e.*, the Fund enters into a short sale as described above while holding an offsetting long position in the security which it sold short). If the Fund enters into a short sale “against the box,” the Fund segregates an equivalent amount of securities owned as collateral while the short sale is outstanding. At May 31, 2008, the Fund had no open short sales.

F. *Option Writing* — When the Fund writes an option, an amount equal to the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current fair value of the option written. Premiums received from writing options that expire unexercised are treated by the Fund on the expiration date as realized gains from investments. The difference between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium reduces the cost basis of the securities purchased by the Fund. The Fund, as the writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option. See Note 7 — Option Contracts for more detail on option contracts written and purchased.

G. *Security Transactions* — Security transactions are accounted for on the date these securities are purchased or sold (trade date). Realized gains and losses are reported on an identified cost basis. Dividend and distribution income is recorded on the ex-dividend date.

H. *Investment Income* — For the six months ended May 31, 2008, the Fund estimated that 90% of the MLP distributions received and 3% of Canadian Royalty Trust distributions received would be treated as a return of capital. The Fund recorded as return of capital the amount of \$14,487 of dividends and distributions received from its investments. This resulted in an equivalent reduction in the cost basis of the associated investments. Net Realized

KAYNE ANDERSON ENERGY TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS — (UNAUDITED) (CONTINUED)

Gains and Net Change in Unrealized Gains in the accompanying Statement of Operations were increased by \$3,530 and \$10,957, respectively, attributable to the recording of such dividends and distributions as reduction in the cost basis of investments.

I. *Return of Capital Estimates* — Distributions received from the Fund's investments in MLPs and royalty trusts generally are comprised of income and return of capital. The Fund records investment income and return of capital based on estimates made at the time such distributions are received. Such estimates are based on historical information available from each MLP and royalty trust and other industry sources. These estimates may subsequently be revised based on information received from MLPs and royalty trusts after their tax reporting periods are concluded.

J. *Dividends and Distributions to Stockholders* — Dividends and distributions to common stockholders are recorded on the ex-dividend date. The character of dividends made during the year may differ from their ultimate characterization for federal income tax purposes. Dividend and distributions to stockholders of each series of the Fund's Auction Rate Preferred Stock are accrued on a daily basis and are determined as described in Note 10 — Preferred Stock. The Fund's dividends and distributions may be comprised of return of capital and ordinary income, which is based on the earnings and profits of the Fund. The Fund is unable to make final determinations as to the tax character of the dividend until the January after the end of the current fiscal year. The Fund informs its common stockholders of the tax character of dividends and distributions made during that fiscal year in January following such fiscal year.

K. *Partnership Accounting Policy* — The Fund records its pro-rata share of the income/(loss) and capital gains/(losses), to the extent of dividends it has received, allocated from the underlying partnerships and adjusts the cost of the underlying partnerships accordingly. These amounts are included in the Fund's Statement of Operations.

L. *Taxes* — It is the Fund's intention to continue to be treated as and to qualify each year for special tax treatment afforded a Regulated Investment Company under Subchapter M of the Internal Revenue Code. As long as the Fund meets certain requirements that govern its source of income, diversification of assets and timely distribution of earnings to stockholders, the Fund will not be subject to U.S. federal income tax.

Income and capital gain distributions made by Regulated Investment Companies often differ from the aggregate GAAP basis net investment income and net realized gains. For the Fund, the principal reason for these differences is the return of capital treatment of dividends and distributions from MLPs, royalty trusts and certain other of its investments. As of November 30, 2007, accumulated dividends and distributions to preferred and common stockholders exceeded accumulated net investment income and net realized gains for GAAP purposes by \$16,390. Net investment income and net realized gains for GAAP purposes may differ from taxable income for federal income tax purposes due to wash sales, disallowed partnership losses from MLPs and foreign currency transactions. As of May 31, 2008, the principal temporary differences were realized losses that were recognized for book purposes, but disallowed for tax purposes due to wash sale rules, and disallowed partnership losses related to the Fund's MLP investments.

For the fiscal year ended November 30, 2007, the tax character of the total \$58,842 dividends and distributions paid to common stockholders was \$43,513 (ordinary income) and \$15,329 (capital gains). For the fiscal year ended November 30, 2007, the tax character of the \$16,101 cash distribution paid to preferred stockholders was \$11,907 (ordinary income) and \$4,194 (capital gains).

KAYNE ANDERSON ENERGY TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS — (UNAUDITED) (CONTINUED)

At May 31, 2008, the identified cost of investments for federal income tax purposes was \$1,077,851, and the net cash received on option contracts written was \$123. At May 31, 2008, gross unrealized appreciation and depreciation of investments and options for federal income tax purposes were as follows:

Gross unrealized appreciation of investments (including options)	\$304,500
Gross unrealized depreciation of investments (including options)	<u>(20,908)</u>
Net unrealized appreciation before interest rate swap contracts and foreign currency related translations	283,592
Net unrealized depreciation on interest rate swap contracts	(5,745)
Unrealized depreciation on foreign currency related translations	<u>(2)</u>
Net unrealized appreciation	<u>\$277,845</u>

Dividend income received by the Fund from sources within Canada is subject to a 15% foreign withholding tax.

Interest income on Canadian corporate obligations may be subject to a 10% withholding tax unless an exemption is met. The most common exemption available is for corporate bonds that have a tenure of at least 5 years, provided that not more than 25% of the principal is repayable in the first five years and provided that the borrower and lender are not “associated.” Further, interest is exempt if derived from debt obligations guaranteed by the Canadian government.

As of December 1, 2007, the Fund adopted FASB Interpretation 48 (“FIN 48”), “Accounting for Uncertainty in Income Taxes.” This standard defines the threshold for recognizing the benefits of tax-return positions in the financial statements as “more-likely-than-not” to be sustained by the taxing authority and requires measurement of a tax position meeting the more-likely-than-not criterion, based on the largest benefit that is more than 50 percent likely to be realized. At adoption, companies must adjust their financial statements to reflect only those tax positions that are more-likely-than-not to be sustained as of the adoption date.

The adoption of the interpretation did not have a material effect on the Fund’s net asset value. The Fund’s policy is to classify interest and penalties associated with underpayment of federal and state income taxes, if any, as income tax expense on its Consolidated Statement of Operations. As of May 31, 2008, the Fund does not have any interest or penalties associated with the underpayment of any income taxes. All tax years since inception remain open and subject to examination by tax jurisdictions.

M. Foreign Currency Translations — The books and records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars on the following basis: (i) market value of investment securities, assets and liabilities at the rate of exchange as of the valuation date; and (ii) purchases and sales of investment securities, income and expenses at the relevant rates of exchange prevailing on the respective dates of such transactions.

The Fund does not isolate that portion of gains and losses on investments in equity and debt securities which is due to changes in the foreign exchange rates from that which is due to changes in market prices of equity securities. Accordingly, realized and unrealized foreign currency gains and losses with respect to such securities are included in the reported net realized and unrealized gains and losses on investment transactions balances.

Net realized foreign exchange gains or losses represent gains and losses from transactions in foreign currencies and foreign currency contracts, foreign exchange gains or losses realized between the trade date and settlement date on security transactions, and the difference between the amounts of interest and dividends recorded on the Fund’s books and the U.S. dollar equivalent of such amounts on the payment date.

Net unrealized foreign exchange gains or losses represent the difference between the cost of assets and liabilities (other than investments) recorded on the Fund’s books from the value of the assets and liabilities (other than investments) on the valuation date.

KAYNE ANDERSON ENERGY TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS — (UNAUDITED) (CONTINUED)

N. *Derivative Financial Instruments* — The Fund uses derivative financial instruments (principally interest rate swap contracts) to manage interest rate risk. The Fund has established policies and procedures for risk assessment and the approval, reporting and monitoring of derivative financial instrument activities. The Fund does not hold or issue derivative financial instruments for speculative purposes. All derivative financial instruments are recorded at fair value with changes in value during the reporting period are included as unrealized gains or losses in the Statement of Operations. The Fund generally values its interest rate swap contracts based on dealer quotations, if available, or by discounting the future cash flows from the stated terms of the interest rate swap agreement by using interest rates currently available in the market.

O. *Indemnifications* — Under the Fund’s organizational documents, its officers and directors are indemnified against certain liabilities arising out of the performance of their duties to the Fund. In addition, in the normal course of business, the Fund enters into contracts that provide general indemnification to other parties. The Fund’s maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred, and may not occur. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

3. Fair Value

SFAS No. 157. In September 2006, the Financial Accounting Standards Board (FASB) issued Statement on Financial Accounting Standards (SFAS) No. 157, “Fair Value Measurements.” This standard establishes a single authoritative definition of fair value, sets out a framework for measuring fair value and requires additional disclosure about fair value measurements. SFAS No. 157 applies to fair value measurements already required or permitted by existing standards. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The changes to current generally accepted accounting principles from the application of this Statement relate to the definition of fair value, the methods used to measure fair value, and the expanded disclosures about fair value measurements.

As of December 1, 2007, the Fund adopted SFAS No. 157. The Fund has performed an analysis of all existing investments and derivative instruments to determine the significance and character of all inputs to their fair value determination. Based on this assessment, the adoption of this standard did not have any material effect on the Fund’s net asset value. However, the adoption of the standard does require the Fund to provide additional disclosures about the inputs used to develop the measurements and the effect of certain measurements on changes in net assets for the reportable periods as contained in the Fund’s periodic filings.

SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into the following three broad categories.

- *Level 1* — Quoted unadjusted prices for identical instruments in active markets to which the Fund has access at the date of measurement.
- *Level 2* — Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets. Level 2 inputs are those in markets for which there are few transactions, the prices are not current, little public information exists or instances where prices vary substantially over time or among brokered market makers.
- *Level 3* — Model derived valuations in which one or more significant inputs or significant value drivers are unobservable. Unobservable inputs are those inputs that reflect the Fund’s own assumptions that market participants would use to price the asset or liability based on the best available information.

The \$847 of unrealized gains, net, presented in the table above relate to investments that are still held at May 31, 2008, and the Fund presents these unrealized losses on the Statement of Operations — Net Change in Unrealized Gains (Losses).

The Fund did not have any liabilities that were measured at fair value on a recurring basis using significant unobservable inputs (Level 3) at November 30, 2007 and at May 31, 2008.

4. Concentration of Risk

The Fund’s investment objective is to obtain a high level of total return with an emphasis on current income paid to its stockholders. Under normal circumstances, the Fund intends to invest at least 80% of the aggregate of its net assets and borrowings (“total assets”) in securities of Energy Companies. The Fund invests in equity securities such as common stocks, preferred stocks, convertible securities, warrants, depository receipts, and equity interests in MLPs, MLP affiliates, royalty trusts and other Energy Companies. Additionally, the Fund may invest up to 30% of its total assets in debt securities of Energy Companies. It may directly invest up to 25% (or such higher amount as permitted by any applicable tax diversification rules) of its total assets in equity or debt securities of MLPs. The Fund may invest up to 50% of its total assets in unregistered or otherwise restricted securities of Energy Companies. It will not invest more than 15% of its total assets in any single issuer. The Fund may, for defensive purposes, temporarily invest all or a significant portion of its assets in investment grade securities, short-term debt securities and cash or cash equivalents. To the extent the Fund uses this strategy, it may not achieve its investment objectives.

5. Agreements and Affiliations

A. *Investment Management Agreement* — The Fund has entered into an Investment Management Agreement with KAFA under which the Adviser, subject to the overall supervision of the Fund’s Board of Directors, manages

KAYNE ANDERSON ENERGY TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS — (UNAUDITED) (CONTINUED)

the day-to-day operations of, and provides investment advisory services to, the Fund. For providing these services, the Adviser receives a management fee from the Fund.

For the six months ended May 31, 2008, the Fund paid and accrued management fees at an annual rate of 1.25% of average monthly total assets of the Fund.

For purposes of calculating the management fee, the “average total assets” for each monthly period are determined by averaging the total assets at the last business day of that month with the total assets at the last business day of the prior month (or as of the commencement of operations for the initial period if a partial month). The total assets of the Fund shall be equal to its average monthly gross asset value (which includes assets attributable to or proceeds from the Fund’s use of preferred stock, commercial paper or notes issuances and other borrowings), minus the sum of the Fund’s accrued and unpaid dividends on any outstanding common stock and accrued and unpaid dividends on any outstanding preferred stock and accrued liabilities (other than liabilities associated with borrowing or leverage by the Fund). Liabilities associated with borrowing or leverage include the principal amount of any borrowings, commercial paper or notes that issued by the Fund, the liquidation preference of any outstanding preferred stock, and other liabilities from other forms of borrowing or leverage such as short positions and put or call options held or written by the Fund.

B. *Portfolio Companies* — From time to time, the Fund may “control” or may be an “affiliate” of one or more portfolio companies, each as defined in the 1940 Act. In general, under the 1940 Act, the Fund would “control” a portfolio company if the Fund owned 25% or more of its outstanding voting securities and would be an “affiliate” of a portfolio company if the Fund owned 5% or more of its outstanding voting securities. The 1940 Act contains prohibitions and restrictions relating to transactions between investment companies and their affiliates (including the Fund’s investment adviser), principal underwriters and affiliates of those affiliates or underwriters.

The Fund believes that there is significant ambiguity in the application of existing SEC staff interpretations of the term “voting security” to complex structures such as limited partnership interests of the kind in which the Fund invests. As a result, it is possible that the SEC staff may consider that certain securities investments in limited partnerships are voting securities under the staff’s prevailing interpretations of this term. If such determination is made, the Fund may be regarded as a person affiliated with and controlling the issuer(s) of those securities for purposes of Section 17 of the 1940 Act.

In light of the ambiguity of the definition of voting securities, the Fund does not intend to treat any class of limited partnership interests that it holds as “voting securities” unless the security holders of such class currently have the ability, under the partnership agreement, to remove the general partner (assuming a sufficient vote of such securities, other than securities held by the general partner, in favor of such removal) or the Fund has an economic interest of sufficient size that otherwise gives it the de facto power to exercise a controlling influence over the partnership. The Fund believes this treatment is appropriate given that the general partner controls the partnership, and without the ability to remove the general partner or the power to otherwise exercise a controlling influence over the partnership due to the size of an economic interest, the security holders have no control over the partnership.

Plains All American, L.P. — Robert V. Sinnott is a senior executive of Kayne Anderson Capital Advisors, L.P. (“KACALP”), the managing member of KAFA. Mr. Sinnott also serves as a director on the board of Plains All American GP LLC, the general partner of Plains All American Pipeline, L.P. Members of senior management and various advisory clients of KACALP and KAFA own units of Plains All American GP LLC. Various advisory clients of KACALP and KAFA, including the Fund, own units in Plains All American Pipeline, L.P. The Fund believes that it is an affiliate of Plains All American, L.P. under the 1940 Act.

C. *Other Affiliates* — For the six months ended May 31, 2008, KA Associates, Inc., an affiliate of the Adviser, did not participate in any agency trades involving affiliated brokerage commissions paid to it by the Fund.

6. Restricted Securities

From time to time, certain of the Fund's investments may be restricted as to resale. For instance, private investments that are not registered under the Securities Act of 1933, as amended, and cannot, as a result, be offered for public sale in a non-exempt transaction without first being registered. In other cases, certain of the Fund's investments have restrictions such as lock-up agreements that preclude the Fund from offering these securities for public sale.

At May 31, 2008, the Fund held the following restricted securities.

8. Investment Transactions

For the six months ended May 31, 2008, the Fund purchased and sold securities in the amount of \$368,923 and \$451,603 (excluding short-term investments, options and interest rate swaps), respectively.

9. Revolving Credit Facility

On May 28, 2008, the Fund entered into a new \$200 million committed revolving credit facility (“New Facility”). The New Facility has a 364-day commitment terminating on May 27, 2009 that may be extended for additional non-overlapping 364-day periods if mutually agreed upon by both the Fund and Custodial Trust Company (“CTC”), an affiliate of the administrator, Bear Stearns Funds Management Inc. The New Facility will initially be a secured facility, but will become unsecured if the Fund issues unsecured senior notes to refinance its auction rate preferred stock. Outstanding loan balances under the New Facility will accrue interest daily at a rate equal to one-month LIBOR plus 1.25% if secured, and one-month LIBOR plus 1.65% if unsecured. The Fund will pay a fee equal to a rate of 0.5% per annum on any unused amounts of the New Facility. The credit facility contains various covenants of the Fund related to other indebtedness, liens and limits on the Fund’s overall leverage. A full copy of the New Facility can be found on the Fund’s website, <http://www.kaynefunds.com>.

Prior to the New Facility, the Fund had an uncommitted secured revolving credit facility with CTC, under which the Fund borrowed from CTC an aggregate amount of up to the lesser of \$200,000 or the maximum amount the Fund was permitted to borrow under the 1940 Act, subject to certain limitations imposed by CTC. For the six months ended May 31, 2008, the average amount outstanding was \$26,628 with a weighted average interest rate of 4.79%. As of May 31, 2008, the Fund did not have any outstanding borrowings on the revolving credit facility.

10. Preferred Stock

At May 31, 2008, the Fund had issued three series of auction rate preferred stock (“Preferred Stock”) for a total of \$280,875. Series A and Series C each consist of 4,000 outstanding shares, each in the amount of \$100,000. Series B consists of 3,235 outstanding shares in the amount of \$80,875. The Fund has authorized a total of 21,000 shares of Preferred Stock. The Preferred Stock has rights determined by the Board of Directors. The

KAYNE ANDERSON ENERGY TOTAL RETURN FUND, INC.
NOTES TO FINANCIAL STATEMENTS — (UNAUDITED) (CONTINUED)

Preferred Stock has a liquidation value of \$25,000 per share plus any accumulated, but unpaid dividends, whether or not declared.

Holders of the Preferred Stock are entitled to receive cash dividend payments at an annual rate that may vary for each rate period. The dividend rates of Series A, B and C Preferred Stock as of May 31, 2008 were 4.62%, 4.72%, and 4.59%, respectively. The weighted average dividend rates of Series A, B and C Preferred Stock for the six months ended May 31, 2008 were 5.50%, 5.73% and 5.35%, respectively. Each rate includes the applicable rate based on the latest results of the auction, and does not include commissions paid to the auction agent in the amount of 0.25%. Under the 1940 Act, the Fund may not declare dividends or make other distribution on shares of common stock or purchases of such shares if, at any time of the declaration, distribution or purchase, asset coverage with respect to the outstanding preferred stock would be less than 200%.

Since February 14, 2008, there have been more Preferred Stock shares offered for sale than there were buyers of those Preferred Stock shares, and, as a result, our auctions have failed, and the dividend rate on the Preferred Stock has been set at such maximum rate. Based on the Fund's current credit ratings, the maximum rate is equal to 200% of the greater of (a) the AA Composite Commercial Paper Rate or (b) the applicable LIBOR rate.

On April 2, 2008, a large financial institution made an unsolicited offer to sell to the Fund 765 shares of the Fund's Series B Preferred Stock for \$18,169 (the liquidation value of such shares was \$19,125). The Fund's Board of Directors approved the purchase, noting that the Fund has a fiduciary duty to accept an offer that is accretive to its common shareholders.

On May 29, 2008, the Fund announced that it had filed with the SEC a notice of its intention to redeem \$125,000 aggregate principal, or 44.5% of its outstanding Series A, B and C Preferred Stock at 100% of par, using borrowings against the New Facility. See Note 13 — Subsequent Events for more detail on the Fund's redemptions of Preferred Stock.

The Preferred Stock is redeemable in certain circumstances at the option of the Fund. The Preferred Stock is also subject to a mandatory redemption if the Fund fails to meet an asset coverage ratio required by law, or fails to cure deficiency as stated in the Fund's rating agency guidelines in a timely manner.

The holders of Preferred Stock have voting rights equal to the holders of common stock (one vote per share) and will vote together with the holders of shares of common stock as a single class except on matters affecting only the holders of preferred stock or the holders of common stock.

11. Interest Rate Swap Contracts

The Fund has entered into interest rate swap contracts to partially hedge itself from increasing interest expense on its leverage resulting from increasing short-term interest rates. A decline in interest rates may result in a decline in the value of the swap contracts, which, everything else being held constant, would result in a decline in the net assets of the Fund. In addition, if the counterparty to the interest rate swap contracts defaults, the Fund would not be able to use the anticipated receipts under the swap contracts to offset the interest payments on the Fund's leverage. At the time the interest rate swap contracts reach their scheduled termination, there is a risk that the Fund would not be able to obtain a replacement transaction or that the terms of the replacement transaction would not be as favorable as on the expiring transaction. In addition, if the Fund is required to terminate any swap contract early, then the Fund could be required to make a termination payment. As of May 31, 2008, the Fund has entered into ten

interest rate swap contracts with UBS AG as summarized below. For all ten interest rate swaps, the Fund receives a floating rate, based on one-month LIBOR.

At May 31, 2008, the weighted average duration of the interest rate swap contracts was 3.5 years and the weighted average fixed interest rate was 4.42%.

12. Common Stock

The Fund has 199,979,000 shares of common stock authorized. Of the 32,209,009 shares of common stock outstanding at May 31, 2008, KACALP owned 4,000 shares. Transactions in common shares for the six months ended May 31, 2008 were as follows:

Shares outstanding at November 30, 2007	32,205,867
Shares issued through reinvestment of dividends and distributions	<u>3,142</u>
Shares outstanding at May 31, 2008	<u>32,209,009</u>

13. Subsequent Events

On July 11, 2008, the Fund paid a cash distribution to its common stockholders in the amount of \$0.53 per share, for a total of \$17,071. Shares of common stock were purchased in the open market in an amount of \$5,408 pursuant to the Fund's dividend reinvestment plan.

On May 29, 2008, the Fund announced that it had filed with the SEC a notice of its intention to redeem the following series of Preferred Stock at 100% of par, which were redeemed on the following dates.

RESULTS OF ANNUAL MEETING OF STOCKHOLDERS
(UNAUDITED)

On June 17, 2008, the Fund held its annual meeting of stockholders where the following matters were approved by stockholders:

- (i) The election of one Class I Directors of the Fund, Gerald I. Isenberg, who was elected by the holders of the Fund's common stock and preferred stock outstanding as of the record date. On this matter, 27,250,857 shares (common stock and preferred stock) were cast in favor, 0 shares were cast against, and 680,440 shares abstained for the election of Ms. Isenberg. As a result of the vote on this matter, Gerald I. Isenberg was elected to serve as director of the Fund for a 3-year term; and
- (ii) The approval of a proposal to authorize the Fund to sell shares of its common stock at a price less than net asset value per share. The Fund would only sell shares at a price below net asset value if the price before deducting underwriting fees and commissions and offering costs was above the Fund's then-current net asset value and if the Fund complied with certain other dilution conditions. The Fund believes that such sales of shares of common stock below net asset value would afford the Fund greater flexibility to raise capital quickly to capitalize on accretive investment opportunities, particularly because the Fund generally attempts to remain fully invested and does not intend to maintain cash for the purpose of making these investments. On this matter, 16 holders of common stock voted in favor, 2 holders of common stock voted against and 0 holders of common stock abstained out of 31 total common stock holders. Additionally, 9,899,759 shares (common stock and preferred stock) were cast in favor, 1,543,789 shares were cast against, and 296,561 shares abstained. As a result of the vote on this matter, the Fund is now authorized to sell shares of its common stock at a price less than net asset value per share for a period expiring on the date of the Fund's 2009 annual meeting of stockholders.
