1) The Distribution Rate is calculated as four times the Distribution Amount divided by the closing price on the Payable Date.

2) Our distribution reinvestment plan (the "DRIP"), may be satisfied by the following two methods:

- a) New Shares issued ("NS") - The number of new or treasury shares to be issued to a stockholder shall be based on share price equal to 95% of the closing price of our common stock one day prior to the Distribution payment date.
- b) Open Market purchases ("OM") - Our Board of Directors may instruct us to purchase shares of our common stock in the open market if our common stock is trading below net asset value at the time of valuation. The plan administrator will receive the distribution in cash and will purchase common stock in the open market, for the

3) Represents a partial payment for approximately 2 months. The full payment would have been \$0.40625.

---

### Tax Character of Distributions

---

KYE's distributions are generally taxable as ordinary income (a portion of which may be qualified dividends) or capital gains. Distributions of KYE's ordinary income plus net short-term capital gains in excess of net long-term capital losses is taxable as ordinary income to the extent of current or accumulated earnings and profits. If KYE's distributions exceed current or accumulated earnings and profits, the distributions will be treated as a return of capital to common stockholders to the extent of each stockholder's basis in KYE's common stock, and then the amount distributed in excess of such stockholder's basis would be taxed as a capital gain. Common stockholders will receive a Form 1099 and will recognize ordinary income only to the extent of current and accumulated earnings and profits. Because the cash distributions received from the MLPs in KYE's portfolio may exceed the earnings and profits associated with owning such MLPs, a portion of KYE's distributions may be paid from sources other than may current and accumulated earnings and profits.
